Software Developer

Denver, CO 80260 | (720) 940-3654 | thaddeus.r.thomas@gmail.com | <https://github.com/thomasthaddeus> | <https://linkedin.com/in/thaddeusthomas>

PROFESSIONAL SUMMARY

- As a recent Information Systems graduate from City University of Seattle, I bring a diverse skill set encompassing project planning, package management, cybersecurity, and effective team collaboration. My academic and professional journey has equipped me with a significant understanding of modern technology landscapes, and I have honed my abilities in both individual and group settings.

PROFESSIONAL EXPERIENCE

CITY UNIVERSITY OF SEATTLE

Student Assistant

2022 – 2023

- Worked for the Center for Cybersecurity Innovation by maintaining the school website, creating presentations about new opportunities for learning, organizing guest speakers, and tracking grants for compliance.

AMAZON, Thornton, CO

Learning Coordinator

2020 – 2022

- Serve as a subject matter expert in delivery operations, identify mistakes/errors and coach associates on how to reduce errors; tenaciously work to bring aging down and resolve quality and safety issues

US ARMY, Worldwide

Intelligence Analyst

2006 – 2014

- Deployed in support of Operation Iraqi Freedom and Operation Enduring Freedom
- Developed analytical products and reports from complex intelligence materials
- Drafted comprehensive reports and detailed collection and analysis of intelligence data
- Operated in a rapidly changing threat-based environment by leveraging expertise in intelligence collection and analysis
- Enhanced security and resilience of Baghdad routing operations with well-curated intelligence

GENERAL DYNAMICS, Afghanistan

Field Support Representative

2010 – 2012

- Deployed to support Operation Enduring Freedom in Afghanistan as Field Service Representative to TiGR (Tactical Ground Reporting System) a DARPA initiative
- Diagnosed and resolved technical hardware and software issues as needed on 300 + servers
- Built a database of imagery of over three thousand maps across 4 countries and collated it to ensure the minimal amount possible was stored on local servers

EDUCATION

Bachelor of Science in Information Systems

City University of Seattle, Magna Cum Laude

2023

TECHNICAL SKILLS

Frameworks: Flask, Ruby-on Rails, Node.js, .NET

Languages: Python, C#, SQL, JavaScript, HTML, Ruby, Kotlin

Tools: Git, Docker, Kubernetes, Jira, Jenkins

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Operating Systems: Windows, Linux

Concepts: OOP, Machine Learning, Agile and Scrum, Data Structures and Algorithms, Cloud Computing, Package Development

Soft Skills: Problem Solving, Communication, Teamwork, Time Management

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals	Issued by Microsoft
Microsoft 365 Certified: Fundamentals	Issued by Microsoft
Microsoft Certified: Power Platform Fundamentals	Issued by Microsoft
Microsoft Certified: Security, Compliance, and Identity Fundamentals	Issued by Microsoft
Microsoft Certified: Azure Data Fundamentals	Issued by Microsoft
Microsoft Certified: Azure Fundamentals	Issued by Microsoft
Certificate of Cloud Security Knowledge v.4	Issued by Cloud Security Alliance

HONORS/AWARDS

Deans List 7x City University of Seattle
Magna Cum Laude City University of Seattle

Thaddeus Thomas

Python Developer

Thornton | thomasthaddeus.com | github.com/thomasthaddeus |
thaddeus.r.thomas@gmail.com | 7209403654

Software Engineer | Data Scientist | Machine Learning Engineer

I am a software engineer who is passionate about building machine learning models and software applications. I am also interested in data science and cloud computing. I love to learn new things and work with people. I am currently learning about deep learning and cloud computing.

WORK EXPERIENCE

CITY UNIVERSITY OF SEATTLE

Teaching Assistant | Aug 2022 - Oct 2023

Worked as a Student Assistant for the Center for Cybersecurity Innovation. I worked on a plethora of projects to better highlight the schools continued effort in expanding cybersecurity education.

python c# linux wordpress wordpress theming jekyll
 azure confluence seo agile unit testing scripting
 jira bash shell ubuntu

AMAZON.COM

Learning Coordinator | Jul 2020 - Mar 2022

Coordinated Training for the entire site along with any trends in the adoption of certain technology after training. Then reported my findings on a weekly basis to the site manager, along with the district learning manager.

python machine learning data science

PROJECTS

H

HTML SCSS CLASS CHECKER

Lead Developer | Dec 2023 - Dec 2023

rubygems.org/gems/html_scss_class_checker

`HtmlScssClassChecker` is designed to streamline the process of frontend development by scanning HTML and SCSS files and identifying classes that are either undefined or unused. This gem aims to facilitate cleaner, more maintainable, and efficient codebases by providing developers with the tools to easily audit and synchronize their HTML and SCSS class definitions. It's an essential tool for web developers looking to optimize their front-end code and ensure consistency across their stylesheets and markup.

ruby

rubygems

J

JEKYLL FILE WIZARD

Lead Developer | Dec 2023 - Dec 2023

rubygems.org/gems/jekyll_file_wizard

`JekyllFileWizard` is a comprehensive gem designed to streamline the management and dynamic updating of Jekyll site structures. It automates the process of checking, creating, and updating various files in a Jekyll project, including HTML files, data files, and more. The gem offers features like dynamic HTML structure handling, integration with Jekyll's data files, template management, robust error handling, an interactive command-line interface, and automated testing and validation. It's ideal for Jekyll site developers looking to enhance their site's functionality and maintainability, making it easier to manage large and complex Jekyll sites.

ALGORITHM SELECTOR

Lead Developer | Dec 2023 - Present

pypi.org/project/AlgorithmSelector

Explore our extensive Algorithms Repository, featuring a diverse range of algorithms from computational methods to data structures, cryptographic techniques, and AI. Ideal for education, research, and practical application, each algorithm is well-documented, tested, and optimized for performance and readability.

NCL Fall 2022 Individual Game Scouting Report

Dear Thaddeus Thomas,

Thank you for participating in the National Cyber League (NCL) 2022 Fall Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL 2022 Fall Season had 7,690 students/players and 475 faculty/coaches from more than 470 two- and four-year schools & 250 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 21 through October 23. The Team Game CTF event took place from November 4 through November 6. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/H0Y7GEVAFAWG

CompTIA. Based on the the performance detailed in this NCL Scouting Report, you have earned **5 hours** of Continuing Education Units (CEUs) as approved by CompTIA. You can learn more about the NCL - CompTIA alignment via nationalcyberleague.org/comptia.

Congratulations for your participation in the NCL 2022 Fall Individual Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

NCL Fall 2022 Team Game Scouting Report

Dear Thaddeus Thomas (Team "Shout IT Out Cloud"),

Thank you for participating in the National Cyber League (NCL) 2022 Fall Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL 2022 Fall Season had 7,690 students/players and 475 faculty/coaches from more than 470 two- and four-year schools & 250 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 21 through October 23. The Team Game CTF event took place from November 4 through November 6. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/7L673LF6F3T4

Congratulations for your participation in the NCL 2022 Fall Team Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

NCL Fall 2023 Individual Game Scouting Report

Dear Thaddeus Thomas,

Thank you for participating in the National Cyber League (NCL) 2023 Fall Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL 2023 Fall Season had 9,770 students/players and 588 faculty/coaches from more than 520 two- and four-year schools & 280 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 20 through October 22. The Team Game CTF event took place from November 3 through November 5. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/7BQ9VMWCXBYU

CompTIA. Based on the the performance detailed in this NCL Scouting Report, you have earned **11 hours** of Continuing Education Units (CEUs) as approved by CompTIA. You can learn more about the NCL - CompTIA alignment via nationalcyberleague.org/comptia.

Congratulations for your participation in the NCL 2023 Fall Individual Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

NCL Fall 2023 Team Game Scouting Report

Dear Thaddeus Thomas (Team "Ctrl+Alt+Defeat"),

Thank you for participating in the National Cyber League (NCL) 2023 Fall Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL 2023 Fall Season had 9,770 students/players and 591 faculty/coaches from more than 510 two- and four-year schools & 270 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 20 through October 22. The Team Game CTF event took place from November 3 through November 5. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/J20325HDKKH7

Congratulations for your participation in the NCL 2023 Fall Team Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

Dr. David Zeichick
NCL Commissioner

NCL Spring 2023 Individual Game Scouting Report

Dear Thaddeus Thomas,

Thank you for participating in the National Cyber League (NCL) 2023 Spring Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL 2023 Spring Season had 7,820 students/players and 533 faculty/coaches from more than 450 two- and four-year schools & 250 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from March 31 through April 2. The Team Game CTF event took place from April 14 through April 16. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/C9RA4F3CCXKG

CompTIA. Based on the the performance detailed in this NCL Scouting Report, you have earned **11 hours** of Continuing Education Units (CEUs) as approved by CompTIA. You can learn more about the NCL - CompTIA alignment via nationalcyberleague.org/comptia.

Congratulations for your participation in the NCL 2023 Spring Individual Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!
